Alex Rivera

San Francisco, CA | alex.rivera@email.com | (555) 234-5678 | linkedin.com/in/alexrivera-ds

Professional Summary

Data Scientist with 3+ years of experience developing machine learning models, exploratory data analysis, and predictive analytics pipelines in Python and SQL. Passionate about transitioning into Generative AI, LLM applications, and vector search systems.

Technical Skills

• Languages: Python, SQL, R, Bash
• ML & Data: Scikit-Learn, Pandas, NumPy, XGBoost, PyTorch, Matplotlib, Seaborn
• Tools & Databases: PostgreSQL, Git, Docker, Jupyter, Streamlit, AWS S3
• Concepts: Supervised Learning, Statistical Modeling, Feature Engineering, EDA

Work Experience

Data Scientist — MetroAnalytics Inc. (2022 - Present)

• Built customer churn prediction model using XGBoost and Scikit-Learn, improving retention intervention accuracy by 18%.
• Engineered automated ETL data pipelines in Python and PostgreSQL processing 500k+ daily transaction logs.
• Developed interactive analytics dashboards in Streamlit used by 40+ sales and operations stakeholders.
• Collaborated with product teams to design and evaluate A/B testing experiments.

Junior Data Analyst — BrightInsight Solutions (2020 - 2022)

• Extracted and synthesized weekly business KPIs from PostgreSQL databases using complex SQL queries.
• Created exploratory data visualization reports and automated monthly management slide decks.

Education

B.S. in Computer Science & Statistics — University of California, Berkeley (2016 - 2020)
